NEC Corporation of America	<p>NEC SmartScan AWARE WebEnroll Livescan Web Licenses</p> <p>WebEnroll is a browser-based biometric enrollment and data management solution available as an enhanced version of BioS (Biometric Services Platform) that utilizes BioComponents for capture of biographic data, fingerprints and facial images in a browser. Each BioComponent performs advanced biometric image autocapture as well as capture device hardware abstraction. Once images are captured, they are submitted to BioSP, where configurable workflows and modular software applications are used for processing, routing, and storage of each transaction. Biometric verification or identification can be added with one of several matchers integrated with BioSP, or an external matching service.</p> <p>Automatic document type recognition: The database includes 7200+ document templates from 243 countries and territories, with new documents added every day. 77 languages available. Support of all MRZ types: Reads all standard ICAO 9303 and ISO 18013 compliant and more than 100 non-standard MRZ formats. No need for network connection: On-device full functionality processing. Barcode data capture from IDs: Supports 1D and 2D barcodes, reads country-specific and non-standard barcode configurations. Extracts all data, including images and non-Latin characters. Cross-comparison and lexical analysis: Analysis and comparison of text data. Compares MRZ and VIZ fields, RFID chip and barcode data and reports any exceptions that occur. ID document authenticity verification: Verification of dates and MRZ check digits, barcode format and image pattern checks.</p>	ea	\$399,500
